214	09 October 2018	Calstock, St Andrew's Church	Bells.	£2,500
213	09 October 2018	Landulph	• Replace the lead roof to the tower, and small access tower to the roof, and the perimeter lead gutter. • Repair cracks in parapet stonework and roof access tower. • Renew door to the access tower. • Remove perimeter flashings and renew • Renew the sarking boarding beneath the lead and replace any rotting timbers. • Provide a tower hoist to get materials up and down from the roof. • Provide temporary safety railing around the perimeter parapet. • Repair/replace cast iron rainwater pipe at North end of tower.	£5,500
212	09 October 2018	Lelant, St Uny	Serious problems with the floor, part of which is already unusable. So far, we have raised approximately two thirds of the £ 141,000 (plus VAT) needed for this urgent work. We have already raised money for, and repaired, the tower. The bell frame is being repaired this autumn but funds received for this would enable us to progress our money raising for the floor being repaired this autumn. (Also we have no disabled access nor internal toilets, and no facilities that could be uses by the wider community. The associated charities with whom you co-operate may be willing to give a grant towards our plans to install these.)	£5,000
211	09 October 2018	Withiel. St Clements	Maintenance Grant	£1,000
210	25 June 2018	Zennor	Due to corrosion over the last 90 years, the bell frame is in a dangerous condition and the bells can no longer be rung. The bells need some restorative work. Bell frame and bells to be removed from the tower. Bell frame to be rebuilt. Bell fittings to be restored and old timber fittings replaced. Bell wheels to be refurbished. Bells to be re-tuned.	£7,500
209	25 June 2018	St. Michael's Perranporth	Our objective with this project is to upgrade our seriously outdated heating system. The current electric heaters are over 40 years old and are now in need or removal, replacement with a more efficient up to date heating system. The PCC has decided that an under floor system would greatly improve our carbon footprint and at the same time help us to reduce our energy costs	£1,000

208	25 June 2018	North Petherwin, St Paternus	For viewing work, cut out corroded Polyphant stone, make and re-fit with N H L 3.5 and coarse sand. Mortar to be analysed by the Cornish Lime Company. To drill and fit Cin Tec sock anchors to arch 24 number, 12 each side to a depth of 850 and 1,200 mm.	£500
207	25 June 2018	St Just-in-Penwith Parish Church	The roof was thought to have last been fully replaced in 1866 when the original waggon style roof was replaced with new Deal timbers and slates. We are looking to: Complete re-roofing of the church utilising Cornish slates Re-leading main valleys to ensure compliance with current guidelines and best practice. Carpentry works and repairs related to the above using traditional techniques, materials and methods Ceiling repairs using lath and lime plaster Masonry repairs to strengthen wall heads etc. Overhauling rainwater goods and low level drainage to ensure water is able to be taken effectively from the main body of the church. Removal of defective and unsafe chimney which is leaning heavily and in need of urgent attention and repair. Re-pointing works to remove defective pointing and inappropriate cement based mortars.	£13,500
206	25 June 2018	St Ewe	1. Urgent work to cure dampness in Spire by removing cement based motar and re-pointing with Lime. 2. To address structural weakness in Spire resulting from Bell Frame main supports corroding	£13,500
205	25 June 2018	Blisland, St Protus and St Hyacinth	The vestry is an add-on in the 17th century we believe. The doorway is some three feet deep. The supporting beams have rotted through due to the pointing of the outer wall and doorway having been eroded due to weather. We need to replace like with like wooden beams and re-plaster internally and re-point outside. We also need to repair the door to the vestry.	£2,000
204	23 March 2018	Zion Community Church,	1. Improving the fire safety of our facilities, in accordance with the actions of a Rand Survey conducted in 2015. 2. Improving our presence in the town through necessary maintenance. 3. Making our facilities more disabled and family friendly.	£2,100
203	23 March 2018	Lelant, St Uny	The restoration of the tower and bell chamber including lifting the lead, the renewal of roof and floor timbers,the rebuilding and strengthening of parapets and the replacement of broken downpipes.The tower will be repointed with lime mortar (all cement pointing and interior cement wash to be removed).	£2,000
202	23 March 2018	st mawes	To remove and have repaired the vestry window and the central window on the north side of the church, both of which are in a very poor state.	£2,500
201	23 March 2018	Sheviock, St Mary's	Approximately 95% of the joints in the tower and spire are loose or hollow and the tower and spire is now listed on the English Heritage At Risk register. There has been a very recent fall of timber within the tower and signs of increasing water penetration which drive an urgent need to safely remove the two bells. Works will include the installation of a safe means of access to the bells so that they and the bell paraphernalia can be inspected, repaired and maintained in the future. The plaster ceiling in the nave was identified as Priority A in the 2013 Quinquennial Report and has subsequently been netted. The Quinquennial inspection of April 2017 also recommended the need to survey and repair the roof bosses during the repairs to the plaster ceiling.	£4,000
200	23 March 2018	Perranporth Methodist Church,	Removing cement mortar strap pointing form roadside face of church building and replacing with flush lime mortar.	£1,300

199	23 March 2018	Penzance RC	Within a development of the crypt levels of the church to give us parish & community facilities to include kitchen, toilets and disabled access (separate funding mostly in place), we are also needing to carry out repairs at crypt level to lintels and stone work to support the church above. This is obviously necessary (rather than desirable) work and is rather urgent & requires completion within the same time period as the separately funded facilities development work detailed above	£6,500
198	23 March 2018	Lanhydrock, St.Hydroc	In recent years Quinquennial Inspection reports have identified problems of damage due to water ingress , arising from deterioration of roof leadwork and slate roofs , and both high and low level drainage, uch that the church structure is no longer fully weatherproof , and in need of increasingly urgent repair. A project has been prepared , which will comprise:- a) replacement of two large leadwork valleys in the roof , and associated overflows b) repair of slate roofs c) replacement of leaking cast iron guttering d) refurbishment of low level drainage e) making good water damage to the interior of the church	£7,500
197	23 March 2018	Gwennap, St. Wenappa	2015: Plaster on the internal southwest wall was stripped to allow the wall to dry out. External repointing in lime mortar- replacing old cement work - was carried out at that time. The internal wall is now dry adeady for re-plastering in lime.	£2,500
195	11 October 2017	Breage, St Breaca Church,	Tower Work. Accessing the pinnacles with scaffolding, removing defective pinning and fixings, dissembling the same, re-securing, pinning, bedding and pointing upon completion. Whilst scaffolding is erected, high level pointing will be undertaken to the	£5,000
